🔗 My Portfolio

Profile

I began my career in frontend development in 2022. Since then, I've gained valuable experience working on various projects, honing my skills in creating engaging user interfaces and improving overall user experiences. My Journey During my time as a frontend developer, I've had the opportunity to work on several exciting projects.

Professional Experience

Front End Developer, *Ulutech* ↗   06/2024 – present
    Aleppo, Syria

- **Abo Hamdi**

I have added many features and improvements to the control panel application for Abu Hamdi Market, where modern technologies have been used to cover a wide range of features designed specifically for store owners, including products, items, permissions, and adjusting the application's settings through the control panel.

- **FID Resturant**

I had the opportunity to work with an amazing team on a huge project, a food delivery service called FID Resturant. I worked on the front-end team where we built the admin dashboard. Our work was to build a dashboard with modern technologies, offering a wide range of features specifically designed to meet the needs of both customers and restaurant owners. The platform includes different modules, including CRUD operations, Firebase notifications, orders, categories, coupons, permissions, and store management.

Front End Developer, *MadSolution*   2023

- **Med sal**

I collaborated with a team of back-end programmers and designers to work on a medical project consisting of two control panels, each containing the basic features and an introductory website for the company.

Front End Developer and ui/ux, *Freelance*

- **Marah school**

I have created and designed a dashboard to fully manage a school and automate the educational process to cover many features that help the manager and supervisor to accomplish their work easily.
